
Grammar: Nouns

With the 'Wortgrammatik: Nomen' app, students can independently discover the grammar of noun phrases. Students can start in the left column, which contains explanatory pre-tasks, and work their way from left to right. The difficulty level increases the further they move to the right.

The progress bar continually informs students whether their answers were right or wrong. Correct answers are highlighted in green, errors are marked by three red bars. Additionally students are given feedback about which exercises they should repeat to improve their weaknesses.
